Reaching Beyond Alberta's Borders

In September, we received an email from a tutor in Colorado. Here's what it read:

Greetings from Colorado:) I just wanted to send a quick thank you...one of my tutoring students was doing research for an aviation project yesterday and he ended up on your web page (this page <http://www.albertaaviationcouncil.com/aviation-heritage-links/>). Tyler thought we should tell someone that we were using the links there:) he found some excellent information for his project so thank you! And we thought we should return the favor so Tyler picked out another aviation resource that he found interesting..."World War II Aircraft" - <https://www.e-aircraftsupply.com/articles/world-war-ii-aircraft.aspx>

It's got some great info on World War II pilots & aviation and he thought it would be a cool addition to the aircraft enthusiast section on that page he found... would you be able to add it? Tyler would be thrilled to see that his suggestion was helpful & I'd love to show him at his next tutoring session:) Thanks again and take care!

Sincerely,

Tyler & Miss Seebeck

We want to thank Tyler and Miss Seebeck for finding us and for helping us provide you with even more information about aviation history.
